

## Profile

I'm a web developer who loves to build beautiful and functional web applications. I enjoy solving problems and learning new things on my journey to build a better web.

## Technical Skills

HTML, CSS, Sass, Git, GitHub, Responsive Web Design, JavaScript, jQuery, Bourbon.io, node.js, Angular.js, UX/UI

## Projects

### CAFÉ CESURA – FEBRUARY 2016 - [HTTP://WWW.CAFECESURA.COM](http://www.cafecesura.com)

- Mobile-first responsive website built and deployed in two days.
- Café Cesura's previous website was a clean landing page consisting only of an image and links to it's social media accounts.
- Tasked with extending the clean, minimalistic look and feel of the current landing page while providing users an easy way to navigate to basic information.
- Emphasis on mobile-first responsive design, semantics, and extendability.
- Technologies leveraged in this project included HTML5, JavaScript, jQuery, Sass, bourbon.io.

### MOMENT – OCTOBER 2015 - [HTTP://MOMENT-APP.HEROKUAPP.COM](http://moment-app.herokuapp.com)

- A fully responsive web application where users can login using their Spotify account and search for songs to create journal-entry like moments for them.
- Technologies leveraged in this project include node.js, mongodb, angularJS, HTML5, JavaScript, Sass, and bourbon.io.
- Version 1.0 developed from concept to completion in a deadline of 4 and a half days.

### APPBOX CLICKABLE PROTOTYPE – SEPTEMBER 2015

- Created a clickable prototype from a provided comp in three and a half days.
- Technologies used included semantic HTML, Sass (no vanilla CSS), jQuery, and JavaScript, node.js, bourbon.io, Git, GitHub.

### LOCALE – JULY 2015

- A web application that helps introduce Seattleites to new and exciting local beers.
- Created from concept to completion in 4 days using the following technologies: HTML, CSS, JavaScript, MongoDB, node.js, Git, GitHub.

## Work Experience

### SELF EMPLOYED; SEATTLE, WA – 2013-PRESENT

#### WEB CONSULTANT & PROJECT MANAGER

- Aerospace Engineering Company (In Process) | Consulting on website redesign

- Project "RedRing" for Seattle's Union Gospel Mission | Assisted in launching a mobile application to mobilize non-profits and equip them to connect those in need to services offered in Seattle. Oversaw multiple teams tasked with data management and provided consulting on UI/UX.
